

STQA Question Bank MCQ for MCA

Subject Name: software Testing and quality Assurance

Sr. No.	Question	Module No.	Option a	Option b	Option c	Option d
1	A fault is hidden by one or more other faults in other Defect masking parts of the program is known as _____	1	Fault hiding	Fault Clustering	Defect Masking	Defect clustering
2	Pesticide Paradox principle of testing says that _____	1	Clustering modules contain most of the defects.	Finding and Fixing defects does not help if the system built is unstable.	Testing is done differently in different context.	Test cases needs to be regularly reviewed and revised.
3	_____ is a principle of Software Testing	1	Testing is carried after coding.	Exhaustive testing is possible	Testing is context dependent	Testing shows absence of defects
4	Verification _____ .	2	Is done with executing the software	Is done without executing the software	After writing the code	After User Acceptance
5	Observation of the system behavior when the system is overloaded is done by _____	2	Stress Testing	Load Testing	Reliability Testing	Volume Testing
6	STLC is related to which model?	2	Waterfall Model	RAD Model	V Model	Spiral Model
7	Testing in which functionalities of software are checked by giving different input is _____ .	2	Sanity Testing	Performance Testing	Functional Testing	Security Testing

8	Arrange the following phases of a formal review according to the order in which they are conducted :- 1. Preparation 2. Kick off 3. Review meeting 4. Planning 5. Follow up 6. Rework	3	4,2,1,3,6,5	4,1,2,3,6,5	1,2,4,3,6,5	4,2,1,3,5,6
9	During review meeting, defects are logged by _____.	3	Manager	Moderator	Scribe	Client
10	What is Static Analysis?	3	The analysis of batch programs.	The reviewing of test plans	The analysis of program code.	The use of black box testing.
11	System testing belongs to _____.	4	Black box testing	Grey box testing	White box testing	User Acceptance Testing
12	_____ checks the borders of the equivalence classes	4	State transition testing	Cause Effect Testing	Decision Testing	Boundary Value Analysis
13	Which of the followings is/are not a Specification Based Technique?	4	Cause-Effect Table	State transition Testing	Decision Coverage	Use case Testing
14	Which is/are not the parts of State Transition Model?	4	The states that the software may occupy	The transition from one state to another	The event that cause a transition	The event that doesn't cause a transition
15	Statement testing, Decision testing, Testing of conditions and Path testing are types of _____	4	Black box testing	Grey box testing	White box testing	Smoke Testing
16	The Cyclomatic number theory in a graph is defined by:	4	$e - n + 1$	$e - n + 2$	$e - n - 2$	$e - n - 1$

17	_____delays with identifying alternative strategies to combat a risk event.	5	Risk avoidance technique	Risk Response	Risk Mitigation technique	Risk contingency technique
18	_____keeps a track of change control and version control of all the files that make up a software product.	5	SCM repository	Test case Data base	Defect Repository	Test Scenarios
19	_____is a communication that happens through the testing cycle as and when defects encountered.	5	Defect Report	Bug Report	Incident Report	Test Summary
20	Module that take necessary inputs and prepares a formatted report is called a _____	6	Report Generator	Configuration Module	Database Module	Repository Module
21	With the increasing use of object-oriented methods for software develop _____are used ever more frequently for testing.	6	Cause Effect diagrams	Transition diagrams	UML notations	Flowcharts
22	Which of the following is not the principle of ISO 900:2000 fundamentals	7	Customer focus	Involvement of people	Process Aproach	Client approach
23	The ISO 9000:2000 standard is based on total _____ principles	7	9	8	12	10
24	_____ is the expected number of defects over a certain time period specified.	8	Defect Density	Defect Rate	Defect removal efficiency	Defect Injection Rate
25	CMM stands for _____	8	Capability Maturity Model	Capability Maturity Measure	Capability Measure Model	Capacity Maturity Model
